

CATASTROPHIC EARTHQUAKES

In a Crowded World

By Thomas L. Holzer,
USGS Research Geologist

- Why have there been so many catastrophic earthquakes at the beginning of the 21st century?
- The history and future of earthquake death tolls, and the urbanization of the planet.
- The modern megacity, and its vulnerability to natural hazards.

Free Public Lecture • April 24, 2014, 7PM

U.S. Geological Survey, Bldg. 3, Auditorium • 345 Middlefield Road, Menlo Park, California
