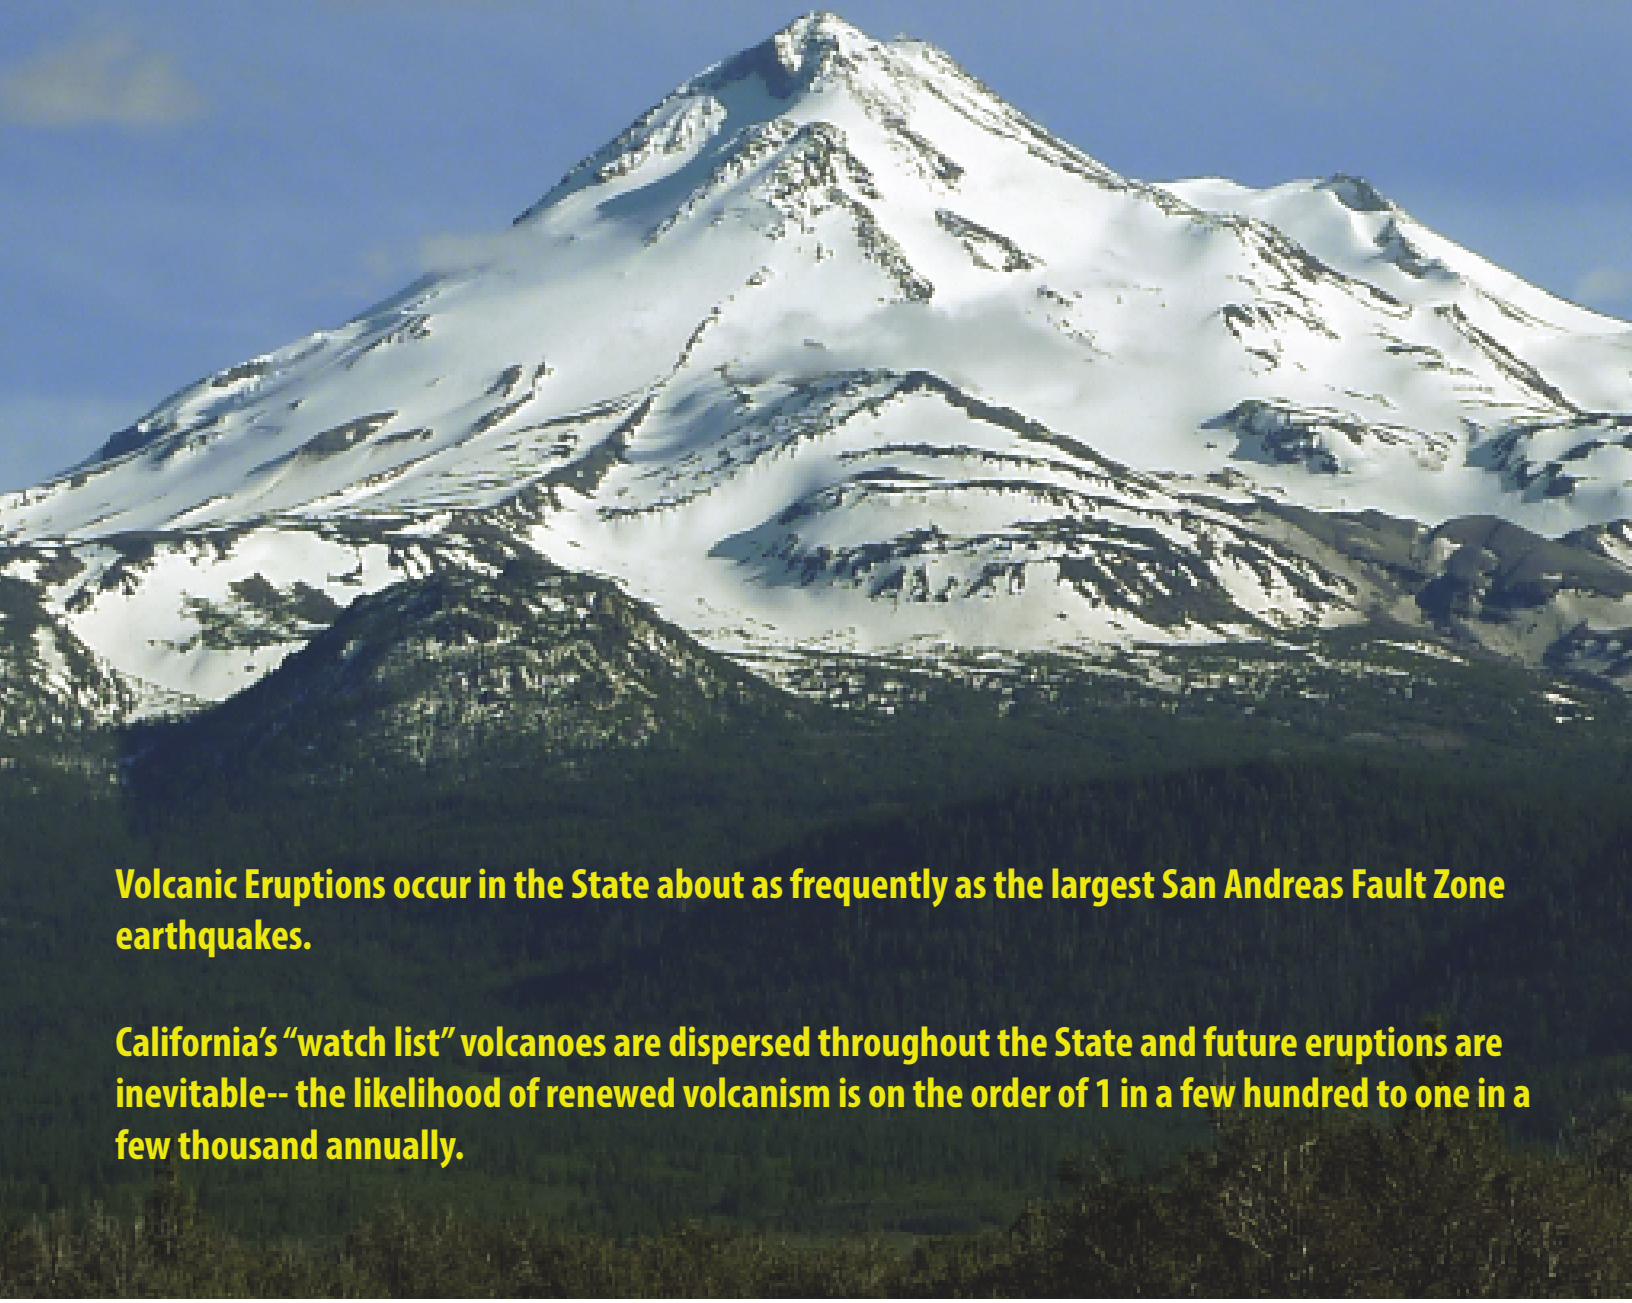
The USGS California Volcano Observatory

It's not just earthquake country!

by Margaret T Mangan, Scientist-in-Charge
USGS CalVO



Volcanic Eruptions occur in the State about as frequently as the largest San Andreas Fault Zone earthquakes.

California's "watch list" volcanoes are dispersed throughout the State and future eruptions are inevitable-- the likelihood of renewed volcanism is on the order of 1 in a few hundred to one in a few thousand annually.

USGS Menlo Park Campus • Free Public Lecture • July 28, 2016 at 7PM

USGS Evening Public Lecture Series: online.wr.usgs.gov/calendar
